MISSION STATEMENT

It is our committed mission to selflessly and transparently serve humanity by facilitating all human beings in attaining their highest conscious collective potential. We achieve this in a manner that is fully socially, economically, technologically and ecologically viable, sustainable and respectful of the natural world. We operate as a high-performance trans-disciplinary catalytic engine of transformation for human evolution.

We invite humanity to co-create adaptable, integrated, compassionate and collaborative systems of consciously managed change. These new systems will in turn guide the future evolution of our species and our effects on the natural world, which we are necessarily the stewards of.

We proactively facilitate the generation of full spectrum solutions of all kinds to address global problems, on any scale, in all geographical or cultural venues. We non-competitively collaborate and transparently facilitate individuals, corporations, organizations and world nations to learn, evolve and align with each other in whatever ways are necessary to co-create a harmonious and functional world change operating system. The WSS operates in supportive concert with everyone to efficiently apply all available resources to produce complete and sustainable resolutions of these defined problems.

The WSS organizational system functions as a central networking hub and educational system for any and all organizations and individuals that choose to work for the global common good.

We accomplish this mission through a dynamic process of faith, hope, love, unyielding compassion, impeccable integrity and wise unified action.

While we focus on the good of the whole, we fully honor and celebrate the self-sovereignty of all individuals and their inalienable right to choose and to exercise their full conscious power, discernment and free will. We are servants of humanity and choose to operate from profound respect for the optimal wellbeing of all future generations and for the world as a whole.
